AMENDMENTS TO THE SPECIFICATION

Amend the paragraph found from page 4, line 28 through page 5, line 2 as set forth below:

In spite of the advantages of voice XML as above mentioned, it is not easy for an ordinary network user to write a voice XML file, which requires the user to have a good command of a large numbers of rules, syntax, and definitions of tags. Accordingly, the present invention provides a method, program storage device readable to machine to implement the method, and system for automatically creating a voice XML file.
